

AgentOne is a Bangalore-based startup dedicated to designing engaging and educational brain games for children. Our mission is to nurture young minds by combining fun with cognitive development, helping kids build critical thinking, memory, and problem-solving skills through play.

We create thoughtfully crafted games like **Memory Maze**, **Logic Ladder**, **Pattern Play**, and **Word Whiz**, each designed to spark curiosity and strengthen core cognitive abilities. At AgentOne, we believe learning should be joyful—and we're here to make that happen.
